Ajay B J

Business Operations & Payments Operations

ajaybj0204@gmail.com linkedin.com/in/ajay-b-j ajay-bj-portfolio.netlify.app

Summary

FinTech Operations professional with 2+ years of experience across Payments, POS Operations, Risk Operations, Merchant Onboarding, and Banking Partner coordination. Experienced in end-to-end merchant onboarding, MID/TID management, device mapping, KYC/AML and risk validation, transaction monitoring, reconciliation, operational reporting, and SLA/TAT-driven issue resolution. Skilled in building SOPs, dashboards, daily trackers, and automated workflows using Excel, Google Sheets, SQL, Power BI, and AI-assisted tools. Recently built and launched four live products (job-search tracking, fitness and gym management, restaurant ordering with payments, and AI-video automation) using AI-assisted development, owning requirements, testing, and delivery.

Skills

Programming & Querying: SQL, Python
Analytics & Reporting: Advanced MS Excel, Google Sheets, Power BI, KPI Dashboards
Tools & Systems: Freshdesk, SFTP (FileZilla), Git & GitHub, Vercel
Risk & Compliance: KYC, AML, Risk Checks, Fraud Monitoring, Transaction Laundering Detection (TLD)
Payments & Operations: Merchant Onboarding, POS Configuration, Bank Integrations, MID/TID Mapping, Device Onboarding, Reconciliation
Product & Development: Requirements & Specs, Next.js, React, TypeScript, Supabase, Firebase, REST APIs, Gemini API, Chrome Extensions
AI & Productivity Tools: ChatGPT, Claude AI, Claude Code, Google Gemini, Astra AI, AI-assisted reporting & automation

Experience

Independent Product Builder (Self-employed) **Sep 2026 – Present**

Portfolio and case studies: ajay-bj-portfolio.netlify.app

- Built and launched four live web products with AI-assisted development (Claude Code); wrote each product spec, made the architecture and business decisions, set up cloud services, and tested every feature end to end.
- **CareerFlow AI** – Job-search platform that reads job emails from Gmail (read-only) and tracks applications automatically; found 105 of my own applications from 90 days of email. Next.js, Supabase, Gmail API, Gemini API, GitHub Actions.
- **FITORA** – Fitness and gym-management app: smart workout logger, AI coach for Indian meals, member and fee management with UPI payment links and WhatsApp reminders, 5 languages, and an Android app. React, Firebase, Gemini API.
- **Mane & Oggarane** – Restaurant ordering and loyalty platform with Razorpay checkout, refunds, delivery rules, and a kitchen dashboard (public demo in test mode). Next.js, Supabase, Razorpay.
- **Ajay AutoFlow** – Chrome extension (Manifest V3) that runs a full AI-video storyboard in Google Flow and saves every clip in order, with a companion website and storyboard planner.

Razorpay – Business Operations (Payments & POS) **May 2025 – Aug 2026**

- Developed comprehensive SOPs, training documentation, and process resources for onboarding Kotak Bank and YES Bank POS merchants, reducing support inquiries by 40% after implementation.
- Managed MID & TID creation, mapping, validation, and configuration as per bank-specific requirements.
- Performed device onboarding, device-to-TID mapping, and resolved setup and configuration issues.
- Conducted KYC verification, risk checks, and compliance validation during onboarding; coordinated with bank teams, internal setup ops, tech, and support teams to resolve integration and configuration issues.
- Troubleshot setup errors including MID/TID mismatches, tagging issues, HSM/TSS issues, and device mapping failures.
- Ensured configuration TAT adherence, smooth merchant go-live, and timely resolution of Freshdesk tickets related to onboarding, setup dependencies, and bank-side issues.
- Handled transaction/operational reconciliation activities, prepared reconciliation reports, and coordinated with bank teams to investigate and track unmatched transactions and exceptions.

- Built and maintained operational dashboards, automated daily trackers, and reusable reporting workflows in Excel/Google Sheets with AI-assisted tools (ChatGPT, Claude AI, Google Gemini), reducing repetitive manual work and improving data accuracy and turnaround time.

G2 Risk Solutions – Risk Operations **Aug 2024 – Apr 2025**

- Worked on TLD (Transaction Laundering Detection) by monitoring merchant transactions to identify suspicious patterns, policy violations, and potential misuse of POS infrastructure.
- Performed risk-based transaction analysis to flag abnormal volumes, MCC mismatches, and high-risk merchant behavior.
- Supported Global Onboarding by managing merchant onboarding processes for international markets, ensuring adherence to global KYC, AML, and risk standards; coordinated with Risk, Compliance, Tech, and Bank Ops teams to resolve onboarding and monitoring issues.
- Spearheaded the implementation of enhanced risk monitoring protocols for high-risk merchants, leading to a 7% increase in the early detection rate of fraudulent transactions.
- Carried out ongoing fraud risk assessments to identify internal fraud risk transactions and ensure they were managed in line with group strategy.
- Ensured accurate documentation, audit readiness, and timely closure of risk and monitoring cases while maintaining high SLA and quality standards.

Projects

Customer Churn Analysis | *Python* **March 2024 – May 2024**

- Analyzed behavior of **7,043 telecom customers** to identify churn patterns based on tenure, contract type, and monthly charges.
- Engineered new features including contract type buckets and tenure bands to improve segmentation and insights.
- Generated 11 visualizations (histograms, box plots, heatmaps) to highlight churn-prone segments.
- Revealed that 38% of churned users were on monthly contracts with less than 3-month tenure; suggested early engagement strategies.

Sales Dashboard for Regional Performance | *SQL, Power BI* **January 2024 – March 2024**

- Queried and joined 3 sales-related tables covering over 25,000 rows across 12 months and 5 regions using optimized SQL joins to create consistent, analysis-ready datasets.
- Built 10 dynamic measures and KPIs in Power BI to track regional sales, return trends, and product performance.
- Designed multipage dashboards with slicers and filters, helping stakeholders drill down by region, product category, and time.
- Detected a 14% sales drop post-festival in the South region; the insight was later used for a marketing recovery plan.

Education

BE – Information Science & Engineering **Graduated: 2024**

New Horizon College of Engineering, Bangalore
